

Please use this diagram to explain

https://npu85.npu.edu/~henry/npu/classes/mastering_bitcoin/mining_and_consequences/slide/Blockchain_Forks.html

Q1: Diverge vs. Reconverge

Note: Less than 5 lines

Q2: How to select blockchain?

Note: Less than 3 lines

Ans:

Q1.

Diverge means separate

Step 2 graph is an example for Diverge

Reconverge means combine or organize

Step 5 graph is an example for Reconverge

Q2.

Select by the block's layer and sequence.

In step 3, we choose the first one on each chain list

In step 5, we choose the top one
