

## Bitcoin Wallet practice

First, we go to block.io website

Click Sign UP to create a new account

Enter the email address

The screenshot shows the Sign Up form on the block.io website. The header is dark blue with links for SECURITY, SUPPORT, FOR DEVELOPERS, LOGIN, and SIGN UP. The form has three input fields: "Your e-mail address...", "Your password...", and "Re-enter password...". Below the form, there's a link to the "User Agreement". A green "SIGN UP" button is at the bottom.

Enter the confirm code sent to email

The screenshot shows the Two-factor authentication screen on the block.io website. The header is dark blue with links for SECURITY, SUPPORT, FOR DEVELOPERS, LOGOUT, and WALLET. A red banner at the top says "Your two-factor code was saved successfully. It is valid for 5 minutes. You can log out, and log in again to request a new code if needed." Below the banner, there's a green "LOGIN" button and a "LOG OUT" link. A white input field for the "Two-factor auth code..." is also present.

If Confirm code enter correctly, we see this, and click skip to sue the Free Plan

Email confirmed. Thanks!

Set Secret PIN

After we set the Secret PIN, we see this

We can see our wallet now

Go click Bitcoin(TestNet!) to testing

We copy the address and go to website <https://coinfaucet.eu/en/btc-testnet/> , paste our address we can get the testing coin, then we check our wallet

The top part of the image shows a browser window displaying the 'Bitcoin testnet3 faucet' page. A modal window indicates that 0.0171623 bitcoins have been sent to the address 2MyMdaJMUGAhzBLFYH64XjZTaVvjfxv8n1E. Below this, the Tixl Wallet interface is shown. It displays a balance of 0.00000000 BT and a pending receipt of 0.01716230 BT. A table of transactions shows the recent receipt. The bottom part of the image shows the 'Security & Terms' page of the Tixl Wallet, which includes instructions on how to use mnemonic phrases and a checkbox for accepting the terms of use and privacy policy.

### Security & Terms

Mnemonic phrases offer permanent and direct access to one's wallet, so they should be treated carefully. These phrases cannot be changed, so keeping them safe is crucial.

More tips for using mnemonic phrases:

- Don't keep the words on a computer, write them down on physical paper.
- Write them down again. And one more time. Keep these lists in easy-to-remember, separate locations.
- Order is important – the phrase will not work in the wrong sequence.

Please be aware of the fact that this Wallet uses Tixl's Autobahn Network v0.1. The use it at your own risk. Coins will not be compensated.

☒ I have read Tixl Wallet's Terms of Use and Privacy Policy and accept both.

We google the Tixl Wallet and create a new wallet

The image shows the 'Security & Terms' page of the Tixl Wallet. It provides instructions on how to use mnemonic phrases and a checkbox for accepting the terms of use and privacy policy. The page is titled 'Security & Terms' and includes a section for 'More tips for using mnemonic phrases' with three bullet points. Below this, there is a disclaimer about the use of the Tixl's Autobahn Network v0.1. At the bottom, there is a checkbox for accepting the terms of use and privacy policy, and two buttons labeled 'Back' and 'Next'.

0.00000003

Note to Recipient

thnaks

?

This transaction will benefit from Tixl's Autobahn Network advantages as the address you entered is mapped in Tixl's Autobahn Network.

**Send transactions on Tixl's Autobahn Network do not trigger any transaction fees (\$0.00).** As a comparison, sending outside of Tixl's Autobahn Network, a \$10 transaction currently costs \$9.64 on the BTC chain or \$9.61 on the ETH chain.
