Q1: Please compare cash and bitcoin in terms of "Location of Money"

Q2; What does Distributed Ledger mean in Blockchain?

Ans:
Q1:
For the Cash, the information (location and owner name) of owner is not publicly disclosed
For the Bitcoin, the owner is publicly recognized, so location is not important

Q2:
Means the database is needed, and it is transparent, will know the owner and don't need to know the location of money
